For Immediate Release

Solar Powered Scales - Weighing devices go green **A new scale idea in the the frontier of energy conservation.**

Carolina Scales, Inc. is very proud to introduce solar powered scales to reduce cost and power to scales needed in remote locations.

Solar power can be applied to all scales with a focus effort on remote portable Truck Scales. The solar power is used to run printers, Weight displays and scales of all types. This gives the end user the ultimate in flexibility.

We can custom design and build a solar powered scale system to fit any needs.

Carolina Scales, Inc. Solar powered systems start about \$1,000.00 and up all depending on your power and application needs. Please contact us with any of your request
