

For Immediate Release:

Carolina Scales received ISO/IEC 17025:2005 Certificate of Accreditation

Implementing an ISO/IEC 17025 laboratory management system is a means to ensuring efficiency and technical competency in calibration and testing laboratories.

This accreditation demonstrates technical competence for a defined scope and the operation of a laboratory quality management system

Accreditation has been granted to Carolina Scales to perform the following calibrations for Mass, Force, and Weighing Devices:

Bench Scales

Floor Scales

Hopper Scales

Laboratory Balances

Rail Scales

Truck Scales

Carolina Scales was established in March 1950 to install and service mechanical truck scales throughout the southeast. During the 1970's & 1980's with the transition from mechanical to electronic devices, Carolina Scales grew from a small sales and service scale company to a quality supplier specializing in sales and the service of industrial scale equipment, material batching & blending, data collection, calibration services, PLCs & weighing control systems and one of the largest rental scale fleets.

We specialize in solving simple & complex weighing solution problems with incredibly user friendly technology. Easy to use, easy to maintain and when the time comes, easy to expand. Our programming/solutions technicians can design a custom system to meet your specific needs in batching, truck in/out, data collection, process control, parts counting, printing and labeling.
